Smart PCV04Q — Industrial Process Control Valve Skid

The Smart PCV04Q combines a process-water valve assembly and electrical controls on a transportable skid. Reference photographs show lever-operated valves, a handwheel valve, clearly marked chiller connections and a frame-mounted control cabinet. The pictured control-power label specifies 115 V single-phase power.

Manufacturer support / operator-instruction request

Manufacturer	Smart Family of Cooling Products
Model	PCV04Q
Equipment type	Industrial process control valve skid
Control power, photographed label	115 V, single phase
Control enclosure	Frame-mounted electrical cabinet
Control indication	Control Power indicator identified on cabinet instructions
Control switch	S1 ON / OFF identified on cabinet instructions
Valve arrangement	Parallel valve / pipe assemblies on a common base
Manual valve hardware	Lever-operated butterfly valves
Additional valve hardware	Handwheel-operated valve visible between pipe runs
Chiller circuit markings	FROM CHILLER / TO CHILLER
Pipe termination	Capped hose connections
Handling frame	Open galvanized steel cage
Forklift handling	Base-frame fork pockets
Overhead handling	Upper-frame lifting eyes
