Pinnacle PDQC-3600 - 3,600 PSI Air Hydrostatic Test System

The Pinnacle PDQC-3600 is a single-stage air-driven hydrostatic test system for pressurizing piping and vessels. Its 36:1 intensifier is rated to 3,600 PSI with a100 PSI air supply, with regulator control and a wheeled cabinet.

Pinnacle PDQC-3600 manufacturer model literature
Pinnacle PDQC - Factory Operating and Service Manual (PDF)

Manufacturer	Pinnacle Industries
Model	PDQC-3600
Maximum output pressure	3,600 PSI at100 PSI air input
Pressure ratio	36:1
Manual published volume at100 CPM	2.60 GPM
Maximum air input	100 PSI
Maximum air consumption	56 CFM; continuous injection at maximum rated pressure; consumption falls to0 at stall
Drive	Pneumatic reciprocating hydraulic intensifier
Water-pressure adjustment	Air regulator
Dimensions L x W x H	19 x21 x44 in., single-stage manual configuration
Manual configuration weight	85 lb
Frame	Wheeled cabinet with handle
Test isolation	High-pressure isolation / bleed controls
